

NEO-ASPHYXICON

Clinical Pearls Of Wisdom On Management Of Asphyxiated Baby

25th September 2016, Gurgaon

'Birth Asphyxia' can lead to severe hypoxic ischemic organ damage(23% Neonatal mortality in India) in newborns followed by a fatal outcome or severe life-long pathologies. The severe insults often cause neurodegenerative diseases, mental retardation and epilepsies. Addressing this would result in reduction in NMR in our country. There have been many advances in the field of birth asphyxia in recent years.

This single theme conference would address all that you want to know about the supportive care of the asphyxiated neonate including basics with words of wisdom coming from some of the most knowledgeable people in the field of neonatology.
