**IAP Neonatology Chapter
Fellowship Examination – 2009**

PAPER II

Saturday, January 10, 2009

Max marks: 100

**Attempt any five out of the six questions.
All questions carry equal marks**

- ✓ Q.1 You are called to attend an LSCS delivery for a 32 weeks gestation with APH. Outline the special preparation for such a delivery, and the management of a baby who does not establish respiration at birth.
- ✓ Q.2 A term, 2500 gram baby, has a serum bilirubin of 18 mg at 48 hours of life. Describe your approach to diagnosis and management.
- Q.3 Describe the issues in management of a baby born of an HIV positive mother.
- ✓ Q.4 A 30 week preterm on the ventilator for RDS shows deterioration at 48 hours of life. Describe your approach to management.
- ✓ Q.5 A term, 1800 gram baby, presents with refractory hypoglycaemia. Outline your approach to diagnosis and management
- ✓ Q.6 Describe the components of a High risk Neonatal follow up clinic.
